PROFILE

Currently in my final year of the Bachelor's Degree in Computer Science at UNLP (Universidad Nacional de La Plata). Passionate about software development and the constant evolution of technology. With solid technical experience in the Full Stack ecosystem (especially with React, Next.js, and TypeScript), I enjoy designing and exploring new tools to build clean interfaces and scalable solutions. I am driven by tackling complex technical challenges, optimizing architectures, and contributing to agile environments that foster innovation and continuous learning.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, SQL, Java.
- **Frontend:** React, Next.js, Vue.js, Tailwind CSS, HTML5, CSS3.
- **Backend & Runtime:** Node.js, NestJS, Express, Bun, Flask, Drizzle ORM.
- **Tools & Databases:** Git, Docker, CI/CD, Agile Methodologies (SCRUM), PostgreSQL, MySQL.
- **Languages:** Spanish (Native), English (B2 Professional Working Proficiency).

INDEPENDENT EXPERIENCE & PROJECTS

Job Application Tracker (jd-tracker) | *Independent Full Stack Developer* Next.js, Prisma, Auth0

- Designed and developed an end-to-end specialized web platform for managing and tracking the status of job applications.
- Modeled and executed the relational database migration using Prisma ORM to ensure data integrity and scalability.
- Implemented a secure authentication system and user session management using Auth0.

Hardware Store E-Commerce (Fedeteria) | *Full Stack Developer* React, Express, MySQL

- Developed and implemented an exchange platform, building 2 complete user flows (catalog and exchange).
- Successfully integrated the Mercado Pago API for automated and secure processing of financial transactions.
- Designed an efficient relational database and implemented user authentication for optimized publication control.

Management System (Cedica) | *Full Stack Developer* Vue.js, Flask, PostgreSQL

- Implemented a centralized management system handling 8+ distinct user roles, improving the productivity of an equine therapy organization.
- Efficiently managed roles and permissions, enabling effective security and optimized queries in every system view using PostgreSQL.
- Integrated cloud Object Storage services for the secure and scalable management of documents and multimedia files.

Management System (TennisApp) | *Full Stack Developer* React, Symfony, MySQL

- Maintained and optimized an administrative and operational management tool for a tennis club.
- Developed new features applying User-Centered Design (UCD) methodologies through A/B testing.
- Built a module for advanced statistics processing and automated equipment management.

EDUCATION

Universidad Nacional de La Plata (UNLP) Buenos Aires, Argentina

Bachelor's Degree in Computer Science Expected Graduation: Jul 2027

Key coursework: Software Engineering, Object-Oriented Programming, Software Laboratory.

Unidad Educativa Colegio Nazaret Bolívar, Venezuela

High School Diploma in Science July 2020
